SBAB Bank AB (publ)

Update to credit analysis

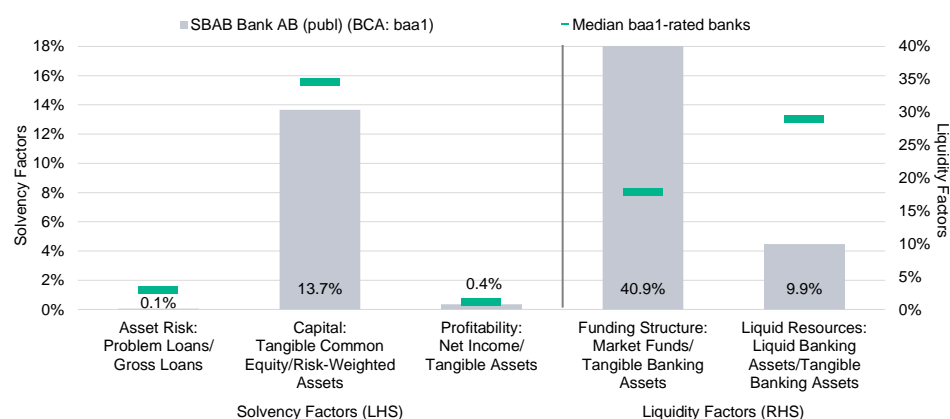

Summary

[SBAB Bank AB \(publ\)](#)'s (SBAB) baa1 Baseline Credit Assessment (BCA) reflects the bank's retail focus, its very strong asset quality focusing on Swedish mortgages, its robust capital along with its moderate profitability which is related to its focus on low risk mortgages. The bank's high reliance on market funding is mitigated by its large use of covered bonds and adequate liquidity.

SBAB's A1/P-1 long- and short-term deposit and senior unsecured debt ratings reflect the baa1 BCA, the results from our Advanced Loss Given Failure (LGF) analysis, leading to two notches of uplift for SBAB's deposit and senior unsecured debt ratings, along with our assumption of moderate support from the [Government of Sweden](#) (Aaa stable), resulting in an additional notch of uplift.

Exhibit 1

Rating Scorecard - Key financial ratios

These represent our [Banks Methodology](#) scorecard ratios. Asset risk and profitability ratios reflect the weaker of either the latest reported or three-year average ratios. The capital ratio is the latest reported figure. Funding structure and liquid resources ratios reflect latest fiscal year-end figures.

Source: Moody's Financial Metrics

Credit strengths

- » An efficient mortgage lender
- » Very strong asset quality
- » Robust risk-based capital

Credit challenges

- » Moderate profitability, related to being a low risk mortgage lender
- » High reliance on market funding, in similarity with most domestic peers
- » Moderate liquidity

Outlook

The stable outlook on SBAB's long-term ratings primarily reflects our expectation that SBAB will be able to maintain its current financial performance, including its good level of capital, very strong asset quality and moderate but stable profitability over the next 12-18 months, with the continued robust growth in the Swedish economy.

Factors that could lead to an upgrade

Factors that could lead to a rating upgrade include a significant improvement in profitability, without a corresponding increase in the bank's risk profile and a materially higher volume of deposits and liquid resources.

Factors that could lead to a downgrade

SBAB's senior unsecured ratings could be downgraded if its buffer of loss-absorbing liabilities were to decline considerably or if Moody's government support assumptions were lowered. Other factors that could lead to a downgrade of the bank's ratings include a deterioration in the bank's capital or recurring profitability, or if its risk profile were to increase because of increased exposure to more volatile sectors.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody.com for the most updated credit rating action information and rating history.

Further to the publication of our revised methodology in July 2021, for issuers that have "high trigger" Additional Tier 1 instruments outstanding, not all ratios included in this report reflect the change in treatment of these instruments.

Profile

SBAB Bank AB (publ) (SBAB) was established in 1985 as The Swedish National Housing Finance Corporation by the Kingdom of Sweden (Government of Sweden) to finance government housing loans. In November 2010, it was awarded a full banking licence and began developing banking products and services. Subsequently, it was renamed SBAB Bank AB (publ). Since 2014, the bank has refocused its operations towards its core business areas of mortgages and residential financing, limiting its offerings of traditional banking products and services. The bank remains wholly owned by the Government of Sweden.

SBAB is a digital bank that provides residential mortgages, loans and savings accounts to individuals, corporates and tenant-owner associations throughout Sweden. Through partners, it also provides its mortgage customers with third-party insurance services. As of end September 2021, SBAB's reported market share in terms of Swedish retail mortgage lending was 8.5%. It reported total consolidated assets of SEK558 billion (\$63.2 billion) as of end September 2021. The bank is increasingly focusing on growing its mortgage portfolio under its own brand and declared in December 2017 its intention to end its remaining bank partnerships.

SBAB does not have any retail branch network. The bank distributes its products and services to individuals primarily through an internet platform and a call centre. It distributes its products and services to corporate customers and tenant-owner associations through personal contacts with representative offices in Stockholm, Gothenburg and Malmö.

Recent developments

Weaker-than-[expected](#) growth momentum and an upside surprise to inflation have dented some of the optimism surrounding the global economic recovery. Over the course of 2022, however, we expect uncertainties with regard to the COVID-19 pandemic, supply chain imbalances and labour shortages to diminish, allowing the economy to enter a stable growth phase through 2023.

However, our [outlook](#) for the Swedish banking system remains stable. The emergence and rapid spread of omicron will likely have a temporary and muted effect, although it adds to additional uncertainty to the economic outlook. The surge in virus cases will no doubt dampen economic activity in pandemic-sensitive services industries in the beginning of 2022 but, as prior virus surges have shown, activity will rebound once the Omicron wave begins to subside. Although support measures by authorities designed to counterbalance the slowdown have mitigated the immediate economic and financial restrictions, we expect a rise in business closures and unemployment, as some measures come to an end and the pandemic lingers on. In Sweden, asset quality may decline slightly

in 2022, although from a strong starting point and despite continued economic growth. The most affected sectors are leisure and accommodation, while mortgage impairments are likely to rise only marginally, if at all.

In November 2021 the previous CEO Klas Danielsson, was replaced by Mikael Inglander as acting CEO while SBAB initiates the process of finding a successor.

Detailed credit considerations

A low risk mortgage portfolio based on strong (industry-wide) underwriting standards

The Swedish economy recovered relatively quickly from the recession in 2020, and the large government support packages to households and businesses have so far mitigated the risk of a sharp deterioration in asset quality. We expect SBAB's asset quality to remain broadly unaffected because of its focus on very low risk mortgage lending in Sweden. The bank's problem loans have remained very low for decades, and its problem loan (stage 3, IFRS9) ratio was 0.05% as of end September 2021.

SBAB's loan book comprise almost only mortgages: single-family dwellings (73%), and tenant-owner associations and private multi-family dwellings (27%), with the remainder being marginal and including exposure to unsecured lending as of end September 2021. In line with legislation, loans are capped at 85% loan to value (LTV) and require amortisation down to 50%. As of end September 2021, the average LTV in SBAB's mortgage portfolio was 56%. SBAB's exposure to commercial properties was low at less than 1% of total lending at the end of March 2021.

The loan book continued to increase during the period January-September 2021, growing its retail mortgage portfolio by 5.4%, relatively faster than the market at 4.9%. We expect the bank to continue its credit expansion at a slightly faster pace than the market average. SBAB has higher-than-average loan growth, but a large part of the new lending is to borrowers that are moving their existing mortgages to SBAB from other banks. Therefore, the loan portfolio has a low share of unseasoned borrowers and relatively lower LTVs compared to those purchasing a new property.

Household debt (200% of disposable income at year-end 2020) has increased in Sweden over a longer period of time, primarily driven by a sustained rise in house prices until autumn 2017. Following a price fall of 9% during autumn 2017, prices have gradually recovered and the housing market has demonstrated unexpected resilience to the coronavirus-induced economic recession. Nevertheless, if there were to be a significant correction in housing prices, [we do not believe that there would be an important impact on the banks' mortgage books](#), but rather on economic growth in terms of reduced private consumption and second round impacts for banks' corporate portfolios.

Like most other banks in Sweden, SBAB's share of lending at variable (i.e. three-month) rates is high and stood at 62% as of end September 2021 (down from 70% at year-end 2020). These borrowers are more exposed to interest rate changes. However, SBAB conducts a 6% interest rate stress test on borrowers during the application process, as is common practice in Sweden. In recent years, the bank has gradually imposed stricter underwriting standards that have reduced both debt-to-income ratio and LTV in new lending. Furthermore, SBAB has adjusted its pricing model, allowing a higher discount to customers with low to moderate LTVs, which supports the collateral values on new mortgages.

Furthermore, SBAB conducts stress tests on its outstanding loans with severe scenarios of higher interest rates, high unemployment and a dramatic drops in property prices. In these stressed scenarios, the bank performs well with loan losses not exceeding annual profit. In Sweden there is also full recourse on mortgages and the values of collateral to limit losses in the loan portfolio, even in an economic downturn.

The assigned Asset Risk score of aa2 reflects the initial score of aa1 and a one-notch negative adjustment as borrowers' repayment capacity has benefited from a long period of above average economic growth combined with ultralow interest rates in Sweden.

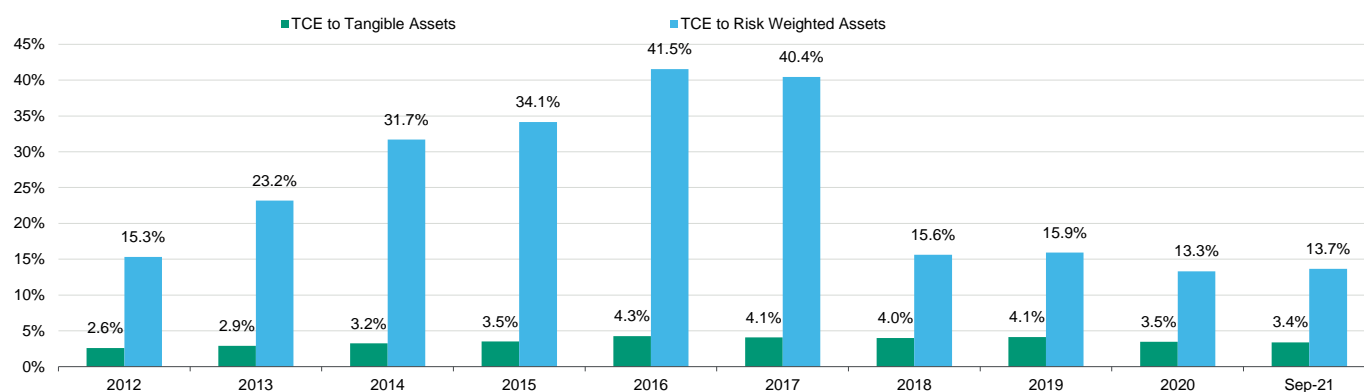

Robust risk-adjusted capitalisation, but low leverage ratio

We view SBAB's capital position as strong, given its low risk profile. As of end September 2021, SBAB reported a Common Equity Tier 1 (CET1) capital ratio of 13.3%, down from 31.5% as of the end of September 2018 [as the 25% risk-weight floor for mortgages were moved into Pillar I from Pillar II](#).

[The Swedish FSA decided to raise the countercyclical buffer to 1% in the third quarter of 2021](#) with effect from the third quarter of 2022, as it was lowered to 0% from 2.5% in March 2020 as a response to the coronavirus outbreak. As part of the European Banking Package and following the completion of the supervisory review and evaluation process (SREP), the Swedish FSA introduced a leverage ratio of 3.3% and a Pillar 2 Guidance of 0% on the risk-weighted capital requirement, as of 24 September 2021. SBAB's total regulatory capital requirement as of the end of September 2021 was 13.9% including an updated Pillar 2 requirement of 3.35%.¹

The bank specific Pillar 2 requirement relates to credit related concentration risk, interest rate risk in other operations, commercial real estate and previously identified faults with SBAB's internal models. SBAB has applied an article 3 surcharge in the capital adequacy, updated its internal ratings-based models and has submitted an application to the Swedish FSA for an approval of its updated models. This leaves the bank with a buffer of 4.0 percentage points above the requirements. The bank's target is to have at least 0.6% buffer above the total capital requirement.

Exhibit 3

SBAB's capital ratios over time

The exhibit shows Moody's-adjusted figures. TCE/RWA for 2012-14 refers to Basel II and TCE/RWA for 2015-21 refers to transitional phase-in of Basel III

Source: Moody's Investors Service

Whereas SBAB's leverage of 3.4% (excluding high-trigger AT1s) would warrant a downward adjustment in the Capital score based on our methodology, we have not done so as the 25% risk-weight that SBAB needs to hold for Swedish mortgages is importantly higher than what Moody's assesses to be the true credit risk for those loans². Risk-weights in other Nordic countries where regulators have not imposed a risk-weight floor tend to be importantly lower (around 15%). Also, SBAB's own IRB risk-weights stood at 3.2% at YE 2020. It should be noted that [SBAB's CET1 ratio fell by around 20 percentage points at the time when the risk-weight floor was moved from PII to PI. Hence, the initial starting point \(TCE/RWAs\) is significantly lower than if the risk-weight floor had not been in PI](#). Moody's has therefore assigned Capital score of a2 for SBAB.

Profitability will remain weaker than peers because of the focus on low-risk mortgages

In the first three quarters of 2021, SBAB's pretax income was SEK1,900 million, a year-on-year growth of 9.1% as the higher loan loss provisions that were taken in relation to COVID-19 last year were not repeated. Net interest income increased by 7.7% year-on-year during the first three quarter of 2021 due to higher lending volumes and lower cost of funding. SBAB's reported return on equity of 11.0% as of end September 2021, which is above the bank's internal of 10% target.

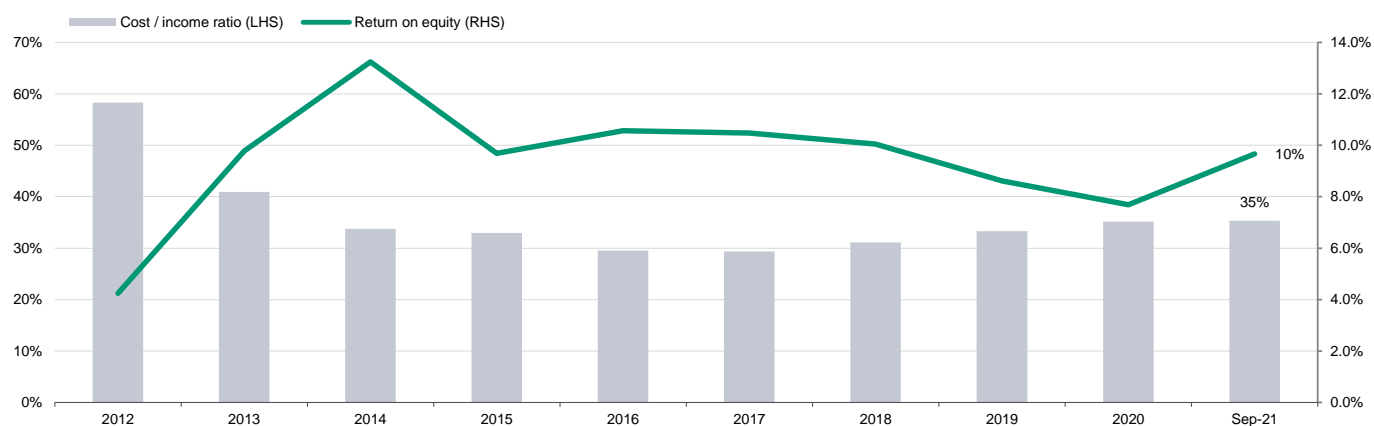

Moody's-adjusted figures showed net income/tangible assets of 0.35% during the first three quarters of 2021, in line with the same period in the previous year. This is lower than many of its Swedish peers, but should be viewed in the context of the very low risk of SBAB's loan portfolio.

SBAB's net interest margin (NIM) increased to 0.75% in the first three quarter of 2021 from 0.72% during the same period in 2020. We expect NIM to be under pressure as competition in the mortgage market is intense. SBAB has benefited from ultralow, even negative, yields on covered bonds and spreads have now returned to around pre-corona levels. As the Swedish Riksbank will start to phase out its covered bond purchases at some point, we would expect higher long-term interest rates and hence higher funding costs for SBAB and other Swedish banks.

To enhance customer offerings, in January 2016, SBAB acquired a majority stake in Booli — one of Sweden's largest housing websites and search engines for homes — which is included in SBAB's retail operations. As of year-end 2020, SBAB held 100% of Booli after acquiring the remaining shares in November 2018. In May 2021, SBAB acquired 58% of the shares in Boappa AB, which is Sweden's largest communication platform for tenant-owners' associations, with a call option for SBAB to acquire the remaining shares of Boappa. Whereas we do not expect these sites to contribute to SBAB's earnings in the next couple of years, but it does give the bank an additional sales channel.

SBAB is an efficient lender operating without a retail branch network. Although the bank's adjusted cost-to-income ratio has deteriorated in the last two years because of higher operating costs, it remains low at 35% for the first three quarters of 2021 (see Exhibit 4).

Exhibit 4

SBAB's cost-to-income ratio and return on equity

Moody's-adjusted figures.

Source: Moody's Investors Service

Our assigned Profitability score of baa3 includes an upward adjustment by one notch which reflects the fact that the bank's moderate earnings are due to a low risk loan portfolio.

High reliance on market funding, but deposit base is increasing

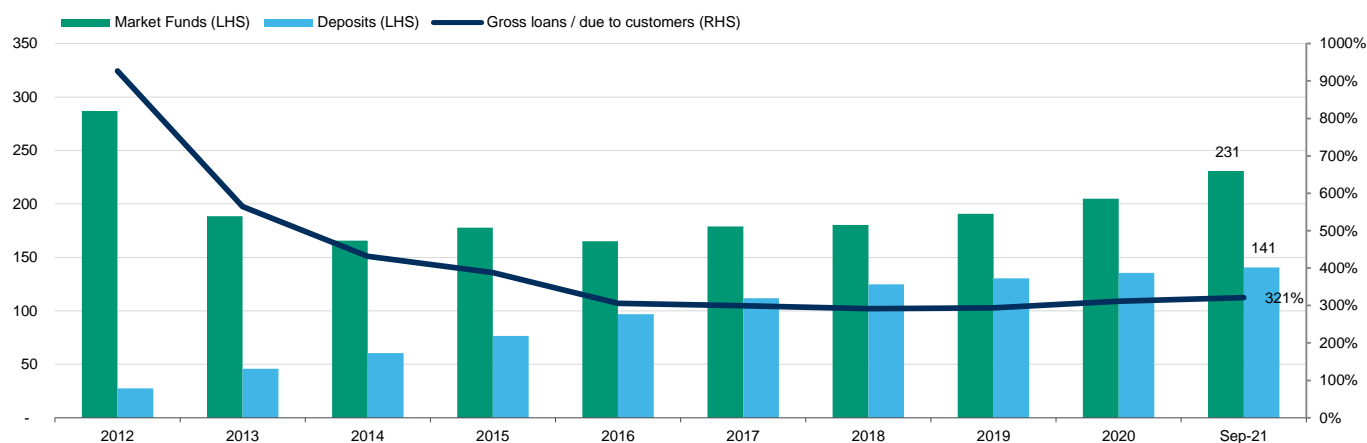

We view SBAB's significant reliance on market funding as a weakness, which is shared by many of its Nordic peers. The high reliance on market funding is mitigated by the fact that a large portion of the funding includes local currency denominated covered bonds, along with SBAB's recent efforts to increase funding duration and a sustained increase in its deposit funding.

SBAB's market funding/tangible assets stood at 41.7% at end September 2021. Covered bonds (rated Aaa) account for more than half of the bank's long-term funding, and around 74% of these were SEK denominated as of the same date. This debt class benefits from a deep local market with stable domestic investors, and we reflect these strengths by viewing covered bonds denominated in local currency as a particularly stable source of funding for all Swedish banks.

SBAB's funding profile has improved over the last few years following its strategy to extend maturities, with a number of successful benchmark issues and a reduction in foreign currency exposures. These have been of longer maturities, taking advantage of the low interest rate environment reducing the asset-liability mismatch.

In addition, SBAB has actively reduced its reliance on market funding through further diversification into deposits, thereby reducing its gross loans/deposits to 321% as of end September 2021 (from 565% at end December 2013). We view the increase in deposits as a sustainable improvement which provides the bank with relatively sticky funding, given the gradual and granular increase in the flow of new depositors. However, the growth in deposits slowed to 3.7% during the first three quarters of 2021, while market funds increased by 12.7%. We expect SBAB to focus on deposit growth in 2022.

Exhibit 5

SBAB's gradual increase in deposits is sustainable

Source: Moody's Investors Service

SBAB needs to fulfill the recapitalisation amount of the minimum requirement of own funds and eligible liabilities (MREL) with subordination requirements by 1 January 2024. The new MREL decisions based on the updated EU Bank Recovery and Resolution Directive (BRRD2), were announced in December 2021³, the subordination requirement resulted in lower senior non-preferred (SNP) needs compared to the previous Swedish requirements.

The upward adjustment in the Funding score of baa2 reflects the comparatively stronger Swedish covered bond market, i.e. the bank's SEK-denominated covered bonds.

SBAB has adequate liquidity

SBAB's liquidity position is adequate, as captured by the ba1 assigned Liquid Resources score. Moody's calculated liquid banking assets consist mainly of highly rated securities, which totalled around SEK70.9 billion at the end of September 2021, equivalent to 12.8% of its tangible banking assets. The bank's reported liquidity reserve was SEK96 billion as of the end of September 2021, equivalent to 17.3% of tangible banking assets, which compares well with that of its peers. SBAB's reported liquidity coverage ratio (all currencies combined) was a high 227%.

We make an upward adjustment in the Liquid Resources score to better reflect SBAB's High Quality Liquid Assets (HQLA).

Monoline adjustment

Similar to that for other rated entities focused on one activity, we apply a one-notch negative adjustment for lack of business diversification to SBAB's financial profile. This is to reflect the fact that the bank's revenue is mostly exclusively derived from its mortgage lending activities and SBAB's business model is less diversified than that of a full-service bank, an adjustment shared with other mortgage lenders, including Skandiabanken in Sweden.

Source of facts and figures cited in this report

The financial data in this report are sourced from SBAB's financial statements or Moody's Financial Metrics, unless otherwise stated.

Environmental, social and governance (ESG) considerations

In line with our general view of the banking sector, SBAB has low exposure to environmental risks and moderate exposure to social risks. See our [Environmental](#) and [Social](#) risk heat maps for further information.

SBAB has policies in place that promote energy-efficient new housing construction, but also help customers with older houses to modernise them to be more energy-efficient. This also enables the bank to build mortgage asset pools to issue green bonds. SBAB offers up to 0.1% rebate on mortgages for the most energy-efficient properties. Because of the increasing demand for sustainable investments, it is likely that green bonds will benefit from discounted rates when interest rates increase, offsetting the rebate given to the customer. However, the current low yields do not allow for any significant differentiation.

The most relevant social risks for banks arise when they interact with their customers. Social risks are particularly high in the area of data security and customer privacy, which is mitigated by sizeable technology investments. Fines and reputational damage because of product mis-selling or other types of misconduct are further social risks. Societal trends are also relevant in a number of areas, such as shifting customer preferences towards digital banking services, increasing information technology costs, ageing population concerns in several countries affecting demand for financial services or socially driven policy agendas that may translate into regulations that affect banks' revenue base. Overall, we consider banks, including SBAB, face moderate social risks.

The widening spread of the coronavirus pandemic, the deteriorating global economic outlook, falling oil prices, and asset price declines are creating a severe and extensive credit shock across many sectors, regions and markets. The combined credit effects of these developments are unprecedented. We further regard the coronavirus pandemic as a social risk under our ESG framework, given the substantial implications for public health and safety.

Governance is highly relevant for SBAB, as it is to all participants in the banking industry. Corporate governance weaknesses can lead to a deterioration in a company's credit quality, while governance strengths can benefit its credit profile. SBAB is governed by the Swedish state and the board is committed to sustainability developments. Corporate governance remains a key credit consideration and requires ongoing monitoring. However, we currently do not have any governance-related concerns over SBAB.

Support and structural considerations

Loss Given Failure (LGF) analysis

We apply our Advanced LGF analysis to SBAB as the bank is incorporated in Sweden, which we consider an operational resolution regime because it is subject to the EU Bank Recovery and Resolution Directive (BRRD). For this analysis, we assume that equity and losses are at 3% and 8%, respectively, of tangible banking assets in a failure scenario. We also assume a 25% runoff of junior wholesale deposits and a 5% runoff of preferred deposits. Moreover, we assign a 25% probability to junior deposits being preferred to senior unsecured debt. These are in line with our standard assumptions. Particular to SBAB and other Swedish pure mortgage lenders, we assume the proportion of deposits considered junior at 10%, relative to our standard assumption of 26%, because of their largely retail-oriented depositor base.

Our Advanced LGF analysis indicates a very low loss given failure for junior depositors and senior unsecured creditors, resulting in a two-notch uplift of the relevant ratings, from the bank's baa1 Adjusted BCA.

SBAB's junior deposit and senior debt ratings reflect our expectations that the bank's issuance of SNP debt to fulfill the recapitalisation amount of MREL by year-end 2023 based on current requirements.

The Swedish resolution authority's - the Swedish National Debt Office's (SNDO) - implementation of the updated EU Bank Recovery and Resolution Directive (BRRD2) in Sweden reduces the portion of MREL which needs to be met with instruments subordinated to senior liabilities compared to BRRD1. As a result Swedish banks, including SBAB, will issue a lower volume of additional loss absorbing junior senior instruments, (i.e. senior non-preferred debt, SNP) than under the previous requirements that were in force until December 2021.

For junior senior debt (called senior non-preferred by the market), which is positioned in line with the bank's Adjusted BCA, our Advanced LGF analysis indicates a moderate loss given failure, given the small volume of debt and limited protection from more subordinated instruments and residual equity.

Government support considerations

SBAB is fully owned by the Swedish government and has an important market share in the Swedish residential mortgage market. This guides our expectation of a moderate probability of government support for SBAB's deposit and senior unsecured debt, which results in a one notch rating uplift for these debt classes.

Counterparty Risk (CR) Assessment

SBAB's CR Assessment is Aa3(cr)/P-1(cr)

The CR Assessment, before government support, is three notches above the Adjusted BCA based on our view that senior obligations represented by the CR Assessment will be more likely preserved than senior unsecured debt to minimise losses, avoid disruption of

critical functions and limit contagion. In addition, moderate probability of government support results in an additional uplift of one notch uplift.

Counterparty Risk Ratings (CRRs)

SBAB's CRRs are Aa3/P-1

The CRRs, before government support, are three notches above SBAB's Adjusted BCA of baa1, reflecting extremely low loss given failure from the high volume of instruments that are subordinated to CRR liabilities, along with one notch of government support.

Methodology and scorecard

About Moody's Bank Scorecard

Our scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

Endnotes

1 [Swedish banks capital requirements, third quarter 2021](#)

2 It should be noted that the 25% risk-weight floor does not represent the SFSA's perceived credit risk for mortgages but was initiated for systemic risk reasons due to high household leverage.

3 [Decisions on resolution plans and MREL, Swedish National Debt Office](#)

© 2022 Moody's Corporation, Moody's Investors Service, Inc., Moody's Analytics, Inc. and/or their licensors and affiliates (collectively, "MOODY'S"). All rights reserved. CREDIT RATINGS ISSUED BY MOODY'S CREDIT RATINGS AFFILIATES ARE THEIR CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MATERIALS, PRODUCTS, SERVICES AND INFORMATION PUBLISHED BY MOODY'S (COLLECTIVELY, "PUBLICATIONS") MAY INCLUDE SUCH CURRENT OPINIONS. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE APPLICABLE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S CREDIT RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
