

SBAB!

# THE QUARTER IN BRIEF

We are pleased and proud to have launched Green Mortgages during the quarter. Our Green Mortgages provide our customers with an incentive for investing in more sustainable and energy-efficient housing.

KLAS DANIELSSON, CEO OF SBAB

### Q2 2018

- Healthy volume growth. Lending to the public increased SEK 7.5 billion to SEK 351.5 billion during the quarter.
   Deposits from the public rose SEK 1.7 billion to SEK 117.0 billion.
- Stable net interest income trend and strong KPls. Net interest income rose SEK 19 million and totalled SEK 850 million. Return on equity amounted to 12.6% and the C/I ratio was 31.6%.
- Green Mortgages launched, with discounted interest rates for customers with houses with an energy rating of A, B or C.
- Finansinspektionen's (the Swedish FSA) annual mortgage survey was published. SBAB performed well in terms of several important KPIs.
- On 18 June 2018, the SNDO announced that the principle for subordinated debt should also apply for SBAB Bank AB (publ), which is allowed to gradually build up the volume of subordinated debt required to meet the minimum requirement for own funds and eligible liabilities (MREL) in the period leading up to 2022.

### **SUMMARY**

|                                  | 2018  | 2018  |           | 2018    | 2017    |            |
|----------------------------------|-------|-------|-----------|---------|---------|------------|
| Group                            | Q2    | Q1    | Δ         | Jan-Jun | Jan-Jun | Δ          |
| Total lending, SEK bn            | 351.5 | 344.0 | 2.2%      | 351.5   | 315.6   | 11.4%      |

<sup>1)</sup> When calculating the return on equity for Q1 2018, Q2 2018 and Jan–Jun 2018, average equity has been adjusted for the dividend of SEK 684 million for 2017.

# THIS IS SBAB

SBAB's business idea is to apply innovation and consideration to offer loans and savings products to private individuals, tenant-owner associations and property companies in Sweden.

### Vision

To offer the best residential mortgages in Sweden

### **Mission**

To help improve housing quality and household finances

### Our operations

SBAB Bank AB (publ) has two business areas: Retail and Corporate Clients & Tenant-Owners' Associations.

### Retail

The Retail business area offers savings and loan products, and home and housing services to consumers. The core product is residential mortgages. We have no traditional bank branches, which means that our products and services are offered online or by telephone. Our retail customers are primarily located in areas around Stockholm, Gothenburg, Malmö, and other university cities and growth regions.

### **Corporate Clients & Tenant-Owners' Associations**

The Corporate Clients & Tenant-Owners' Associations business area offers savings and housing financing primarily to property companies and tenant-owners' associations. Our credit granting in the Corporate Clients & Tenant-Owners' Associations business area is concentrated to growth regions surrounding our three offices in Stockholm, Gothenburg and Malmö.

### Our owner

We started our operations in 1985 and are wholly owned by the Swedish state.

# STATEMENT FROM THE CEO

We are pleased and proud to have launched Green Mortgages during the quarter. Our Green Mortgages provide our customers with an incentive for investing in more sustainable and energy-efficient housing. In our operations, we take responsibility and contribute to collectively reaching the Sustainable Development Goals in Agenda 2030.

Our customer offering continues to attract many new customers, which means business is going well for SBAB. Our total lending increased 2.2% to SEK 351.5 billion during the quarter. Our total deposits rose 1.5% to SEK 117.0 billion. The underlying earnings trend remained healthy. The operating profit totalled SEK 575 million (576) and the return on equity amounted to 12.6% (13.0). The Common Equity Tier 1 (CET1) capital ratio was 30.3% (31.1). Sound finances together with growth, profitability and capital strength are prerequisites for being able to complete the investments necessary for an even stronger customer offering aimed at strengthening SBAB's long-term competitiveness.

### Competition and conditions

The digitalisation of the banking and financial sector is increasingly clear and accelerating. Digitalisation enables new services and changes customers' behaviour and expectations. Established players are working intensively to retain, defend and strengthen their positions. Many banks and new players have entered the competition for residential mortgage customers. Some new players only offer mortgages to certain categories of customers and with the help of new types of financing solutions.

I would like to highlight the importance of responsibility. The long-term responsibility toward customers and for the confidence of the general public. Offering a mortgage is offering the opportunity to realize the dream of a home. Taking a mortgage of perhaps several million kronor is one of life's biggest decisions. This means that mortgage providers are subject to stringent requirements in terms of transparency, consideration and availability, which are the same as SBAB's value proposition to customers, and which forms the foundation of the high level of confidence we have built over many years. The advent of new providers and new financing solutions also highlight how important it is that the Swedish FSA ensures that the market sets the same requirements for banks and other providers, thus enabling competition on equal terms.

Essentially, increased competition is very positive — it leads to more customers obtaining better and fairer terms. Statistics from SBAB's interest-rate comparison service "Räntematchen," which allows consumers to compare their existing mortgages with the interest terms that SBAB can offer, indicate that many customers

of major banks are still paying excessively high mortgage interest rates, sometimes by as much as half a percentage point.

SBAB's share of net growth in the residential mortgage market totalled a full 17% for the first five months, compared with our total market share of slightly more than 8%. This indicates strong growth and that we are capturing market shares. Increased price competition and lower funding costs resulted in us lowering mortgage rates in the quarter, first in May for the most popular maturities (3M, 1Y and 2Y), and then in June for the longer maturities. Transparency and attractive terms and conditions comprise central components of our customer offering.

Our lending growth means that lending responsibly is particularly important, moreover, our lending growth must be long-term sustainable. We believe this was confirmed by the Swedish FSA's latest annual mortgage survey. The survey showed that SBAB performed well in terms of several key performance indicators such as average loan-to-value ratio, level of indebtedness, amortisation rate and compliance with the amortisation requirement.

During the quarter, we have successfully adapted operations to new regulations that entered force during the quarter, such as the Revised Payment Service Directive (PSD2), which is driving the exciting open banking developments, and the General Data Protection Regulation (GDPR), which is creating equal and uniform protection of personal data within the EU.

### Continued uncertainty in the new build market

In Sweden's regional housing markets, signals indicate that the supply of housing has been greater than the real demand, both for existing and new builds. Examples of such signals include longer advertisement times, fewer bidders per object, falling bid premiums and a larger proportion of housing with lowered prices. The substantial increase in housing supply from new builds, together with the new repayment terms and tighter credit terms from the banks led to falling house prices in the second half of 2017. After a minor upward correction in early 2018, housing prices have essentially been still.

The number of homes for sale is at record levels and sales statistics show many housing developers are struggling to sell their newly built apartments, despite the continued strength of underlying demand for housing. As a consequence of the diffi-

cultly in selling newly built apartments at current price levels, the number of newly built apartments is expected to decline relatively rapidly over the coming years. Going forward, the overall pace of construction of new homes is expected to be far below the actual need for housing. Given the uncertain market conditions, we have for some time been more cautious in our lending to residential developers by focusing on established relationships and more experienced construction contractors.

We still aim to increase our financing of new builds, since we want to help solve Sweden's housing shortage. However, an increasing number of new, cheaper homes are needed that people actually want and for which they can obtain a mortgage to be able to buy.

### Sustainable customer offering

Housing accounts for a major share of Sweden's energy consumption. As a bank, our credit granting enables us to influence the market through requirements, stimuli and dialogue with the aim of reducing energy consumption. We are therefore pleased and proud to have launched our Green Mortgages during Q2 — a mortgage with a discounted interest rate for customers with houses with an energy rating of A, B or C. In Q3, we intend to launch Green Mortgages for customers who live in tenant-owner apartments. We already offer the Energy Loan, a consumer loan with a 0.50 percentage point discount on the interest rate for investing in energy saving measures in the home, and Green Loans to tenant-owners' associations on similar terms.

Green Mortgages are offered to those customers who have energy performance certified buildings with an energy rating of A, B or C. C is the lowest energy performance rating permitted for new builds under the applicable building regulations. The National Board of Housing, Building and Planning's statistics show that as much as 80% of Swedish houses and multi-family dwellings do not meet that level and, accordingly, consume more energy than what is permitted in new builds. Customers with a mortgage object with an energy rating of A or B receive a 0.10 percentage point interest rate deduction on their mortgage, and those with an energy rating of C receive a 0.05 percentage point interest rate deduction.

A sustainable customer offering means we can influence and contribute to changing the world, and toward together achieving the Sustainable Development Goals (SDGs) under Agenda 2030. We have selected the SDGs 8, 11, 12 and 13 as the goals where SBAB's operations can make the clearest contribution <sup>1)</sup>.

I wish you all a wonderful, sustainable summer.

Solna in July 2018

fred 2

Klas Danielsson CEO of SBAB

<sup>1)</sup> SBAB has identified and chosen four of the 17 SDGs that we consider particularly important and relevant for our operations: Goal 8: Decent work and economic growth, Goal 10: Sustainable cities and communities, Goal 11: Responsible consumption and production and Goal 12: Climate action.

### Trend for Q2 2018 compared with Q1 2018

#### Market comments

The booming Swedish economy remained strong in Q2 2018, although a slight decline was discernible in some industries compared with year-end 2017. Pressure on the market for financing of housing also intensified in Q2. The growth rate in lending for homeowners of houses or tenant-owner apartments remained at the same high level as in 2017, despite a decline in housing prices at the end of 2017. Low interest rates together with strong economic growth and low unemployment have contributed to this trend. House prices for the country as a whole recovered slightly in Q1 and remained relatively still in Q2 2018. Over the last 12 months however, prices have declined by an average of 4%. The largest decline was for tenant-owner apartments, 7%, whereas house prices only fell 2% over the last 12 months. The growth in lending to property companies with apartment blocks, including tenant-owners' associations, remained at about the same level as in the most recent previous quarters. However, there has been a shift in the rate of growth, with a slightly lower rate for tenant-owners' associations and a slightly higher rate for other owners of apartment blocks. The generally high growth rate was driven by the record high construction rates.

#### Group

Lending to the public increased 2.2% in the quarter to SEK 351.5 billion (344.0). New lending remained healthy and totalled SEK 18.5 billion (19.2). Deposits from the public increased 1.5% in the quarter to SEK 117.0 billion (115.3).

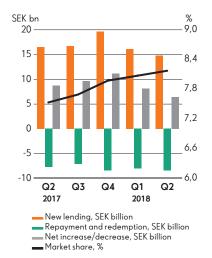

#### Retail

The Retail business area offers savings and loan products, and home and housing services to consumers. The core product — residential mortgages — is supplemented with consumer loans, savings accounts and insurance broking.

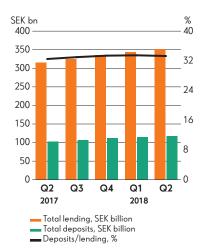

In Q2, new retail lending amounted to SEK 15.0 billion (16.3) driven by a strong customer offering, competitive rates and successful communication initiatives. During the quarter, SBAB lowered mortgage rates for the most popular maturities. Moreover, Green Mortgages were launched, with discounted interest rates for customers with houses with an energy rating of A, B or C. Total lending increased to SEK 264.8 billion (258.3) during the quarter, of which SEK 262.7 billion (256.3) comprised residential mortgages and SEK 2.1 billion (2.0) consumer loans. The number of residential mortgage customers increased to 262,000 (259,000), distributed over 167,000 mortgage objects (165,000). The majority of SBAB's residential mortgage customers choose shorter maturities. The share of total lending with a 3M variable mortgage rate amounted to 70.2% (69.1) at the end of the quarter. At 31 May 2018, the market share of residential mortgages was 8.16% (8.06% at 28 February 2018). At the same date, the market share for consumer loans was 0.86% (0.86).

SBAB's savings accounts continue to offer competitive interest rates compared with the company's competitors, and deposit inflows continued to grow during the quarter. Retail deposits increased and totalled SEK 81.0 billion (77.9). At 31 May 2018, the market share of retail deposits was 4.51% (4.39% at 28 February 2018).

### Lending and market shares, Retail mortgages

### Total deposits in relation to total lending, Group

### Corporate Clients & Tenant-Owners' Associations

The Corporate Clients & Tenant-Owners' Associations business area offers savings and loan products to property companies and tenant-owners' associations.

During the quarter, new lending to property companies and tenant-owners' associations remained healthy and totalled SEK 3.5 billion (2.9) driven by reasons including a number of larger corporate transactions in conjunction with the payment of credits as part of ongoing housing construction. Total lending increased to SEK 86.7 billion (85.6). Of total lending, SEK 34.4 billion (33.4) comprised lending to corporate clients and SEK 52.3 billion (52.2) lending to tenant-owners' associations. The market share of lending to corporate clients was 11.30% at 31

May 2018 (11.19% at 28 February 2018). At the same date, the market share for lending to tenant-owners' associations was 10.00% (10.13). The number of loan customers declined to 2,278 (2,345) over the quarter, in line with SBAB's current strategy focusing on larger customers and customers in regions where SBAB has physical presence with ability to establish customer relationships.

Deposits from corporate clients and tenant-owners' associations decreased during the quarter and totalled SEK 36.0 billion (37.4). At 31 May 2018, the market share of deposits from corporate clients and tenant-owners' associations (excluding financial institutions) was 3.67% (3.79% at 28 February 2018).

<sup>1)</sup> When calculating the return on equity for "Q1 2018", "Q2 2018" and "Jan-Jun 2018", average equity has been adjusted for the dividend of SEK 684 million for 2017.

### Trend for Q2 2018 compared with Q1 2018

Operating profit amounted to SEK 575 million (576). Higher net interest income positively impacted the item while higher expenses had a negative effect. After tax, the operating profit was SEK 444 million (443). Return on equity amounted to 12.6% (13.0) and the C/I ratio was 31.6% (30.0).

#### Net interest and commissions

Net interest income grew to SEK 850 million (831), mainly due to higher lending volumes and a lower actual resolution fee outcome. The resolution fee was SEK 75 million (87) for the quarter. According to a decision from the Swedish National Debt Office in May this year, the fee for SBAB amounts to SEK 299 million for the full-year 2018, which is below the estimate of SEK 348 million communicated in the last interim report. Lower lending margins, as a result of items including lower mortgage rates, had a certain negative impact on the net interest income trend.

Net commission income increased during the quarter to SEK 1 million (expense: 5), due mainly to increased provisions for brokering mortgage insurance. Increased expenses linked to funding operations negatively impacted the item.

#### Net result of financial transactions

The net expense from financial transactions decreased to SEK 28 million (expense: 26) mainly as a result of the revaluation of instruments encompassed by hedge accounting.

#### Expenses

Expenses increased to SEK 264 million (242), and were attributable to higher personnel, IT and marketing costs in the quarter. The development is according to plan and in line with SBAB's investment strategy for long-term competitiveness.

### Credit quality and credit losses

As of 1 January 2018, SBAB reports expected credit losses in accordance with IFRS 9. This means that the opening balances for 2018 have been recalculated, please refer to notes 12 and 15. In Q2, credit losses amounted to recoveries of SEK 8 million (recoveries: 10) as a result of recoveries of previous impairments of impaired corporate loans, mainly in credit stage 3. Provisions for non-credit impaired loans, credit stages 1 and 2, increased SEK 5 million during the quarter, mainly due to increased lending volumes. Provisions for loan commitments remained unchanged in the quarter. For more information, please refer to notes 3 and 4.

At the end of the quarter, the average LTV ratio<sup>1)</sup> in SBAB's mortgage portfolio was 61% (58). At the same date, the average residential mortgage to retail customers amounted to SEK 1.6 million (1.6).

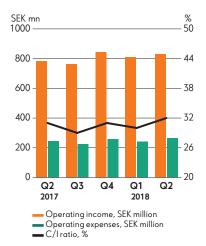

### Other comprehensive income

Other comprehensive income was SEK 151 million (expense: 79). The increase was mainly due to the positive impact on the item of a downturn in long EUR interest rates during the quarter.

### Operating profit and return on equity, Group

### Income, expenses and C/I ratio, Group

<sup>1)</sup> The loan-to-value ratio is defined as the size of a loan in relation to the market value of pledged collateral. The reported average is the weighted average. Where applicable, the calculation takes into consideration contributory factors such as guarantees and the collateral's lien priority. SBAB verifies property values on a regular basis. For residential properties and tenant-owners' rights, the property value is verified at least every third year.

# Trend for January-June 2018 compared with January-June 2017

During the period, operating profit rose to SEK 1,151 million (1,088) as a result of higher net interest income. Higher expenses and lower net income from financial transactions had a negative impact on the item. Net interest income grew to SEK 1,681 million (1,556), mainly due to higher lending volumes. The resolution fee, recognised in net interest income, totalled SEK 162 million (123) for the period. The net commission expense amounted to SEK 4 million (expense: 5) for the period. The net expense from financial transactions was SEK 54 million (expense: 7), primarily due to the revaluation of credit risk in deriv-

atives. Other comprehensive income amounted to SEK 73 million (expense: 457) for the period. The difference was attributable to a decline in long-term EUR interest rates in H1 2018, compared with an increase in interest rates in the corresponding period last year, which had a positive impact on the item. Expenses grew to SEK 506 million (476), mainly driven by higher personnel costs but also due to investments in IT and marketing. Credit losses amounted to recoveries from previous impairments of SEK 18 million (recoveries: 5) for the period. For more information on credit losses, please refer to notes 3 and 4.

### **BALANCE SHEET OVERVIEW**

| Group, SEK million  | 30 Jun 2018 | 31 Mar 2018 | 31 Dec 2017 | 30 Jun 2017 |
|---|-------------|-------------|-------------|-------------|
| ASSETS  |             |             |             |             |
| Chargeable treasury bills, etc.   | 34,421      | 27,447      | 22,952      | 24,496      |

<sup>&</sup>lt;sup>1)</sup> The Swedish FSA has proposed introducing the existing risk-weight floor for mortgages applied in Pillar 2 as a requirement within the framework of Article 458 of the Capital Requirements Regulation. The change means that the capital requirement is set as a minimum requirement in Pillar 1. The change is proposed to enter force from 31 December 2018. For more information, refer to page 11 and Note 10.

 $<sup>^{2)}\,\</sup>mbox{Calculated}$  in accordance with the applicable regulations at the reporting date.

<sup>3)</sup> According to the European Commission's Delegated Regulation with regard to liquidity coverage requirements. For all currencies combined.

<sup>&</sup>lt;sup>4)</sup> As per SBAB's interpretation of the Basel regulatory framework.

### Trend for Q2 2018 compared with Q1 2018

#### **Balance sheet comments**

Chargeable treasury bills increased during the quarter to SEK 34.4 billion (27.4). The change was within the scope of the normal management of the liquidity reserve. Bonds and other interest-bearing securities amounted to SEK 53.4 billion (53.1). Lending to credit institutions increased to SEK 12.7 billion (11.0), attributable to higher repo volumes within the scope of the normal short-term liquidity management. For information regarding lending to the public, please refer to page 6.

Liabilities to credit institutions increased to SEK 20.5 billion (17.4) during the quarter and were also driven by increased repo volumes within the scope of the normal short-term liquidity management. Subordinated debt totalled SEK 4.9 billion (4.9). During the quarter, equity decreased to SEK 16.1 billion (16.2), primarily due to the owner's dividend. For information about deposits from the public and debt securities issued, please refer to page 6 and the "Funding" section below. For more information of the effects of IFRS 9 on equity, please refer to notes 12 and 15.

#### **Funding**

Funding activity remained high in the second quarter of the year. In total, the SBAB Group issued bonds for around SEK 53 billion in 2018, compared with bonds maturing during the year of about SEK 62 billion. During the quarter, issues included an EUR 500 million 15-year covered bond and an EUR 750 million 5-year covered bond in the European market.

During the quarter, securities were issued for a total of SEK 39.9 billion (25.9). In parallel, securities were repurchased for SEK 3.5 billion (4.8) and securities amounting to SEK 22.8 billion (12.0) matured. Alongside changes in premiums/discounts and changes in SEK exchange rates, this resulted in an increase in issued debt securities outstanding of SEK 13.2 billion to a total of SEK 301.8 billion (288.6). At the end of the quarter, commercial paper borrowing amounted to SEK 5.7 billion (7.9) and senior unsecured funding amounted to SEK 56.6 billion (64.6). Funding through the issue of covered bonds is carried out by the wholly-owned subsidiary, SCBC. Covered debt outstanding totalled SEK 239.5 billion (216.1), of which SEK 161.4 billion was in SEK and SEK 78.1 billion was in foreign currencies.

### Liquidity position

SBAB's liquidity reserve primarily comprises liquid, interest-bearing securities with high ratings. At the end of the quarter, the market value of the assets in the liquidity reserve amounted to SEK 82.5 billion (80.4). Taking the Riksbank's and the ECB's haircuts into account, the liquidity value of the assets was SEK 79.5 billion (76.8).

SBAB measures and stress-tests liquidity risk, for example, by calculating the survival horizon. The survival horizon totalled 444 days (274), which the company deems satisfactory.

According to the European Commission's Delegated Regulation with regard to liquidity coverage requirements, at 30 June 2018, the LCR was 301% (283) in all currencies combined, which exceeds the minimum requirement of 100%.

Measured in SEK, the LCR was 203% (190). The net stable funding ratio (NSFR), which measures the difference in tenors between commitments and funding, amounted to 122% (117) according to SBAB's interpretation of the Basel rules.

For more information on SBAB's liquidity position, please refer to Note 9.

### Capital position

SBAB primarily recognises credit risk under the internal ratings-based approach (IRB approach) and operational and market risk using the standardised approach. According to SBAB's capital targets, the CET1 capital ratio should under normal conditions be at least 1.5 percentage points higher than the CET1 capital requirement communicated by the Swedish FSA. In addition, under normal conditions, SBAB's total capital ratio should be at least 1.5 percentage points higher than the capital requirement communicated by the Swedish FSA. The bank is also tasked with meeting any other regulatory capital requirements. SBAB's lending rose to a total of SEK 351.5 billion (344.0) during the quarter. The capital requirement was mainly impacted by the increase in lending. SBAB's capital targets are expected to correspond to a CET1 capital ratio of not less than 26.4% and a total capital ratio of not less than 36.5% at 30 June 2018. SBAB's CET1 capital amounted to SEK 13,857 million (13,658) and total capital was SEK 20,304 million (20,105). The risk exposure amount was SEK 45,712 million (43,939). This corresponded to a CET1 capital ratio of 30.3% (31.1) and a total capital ratio of 44.4% (45.8). Net profit/loss for the period was included in own funds while expected dividends reduced own funds.

The Swedish FSA has proposed changing the method for applying the existing risk-weight floor for Swedish mortgages, which is currently applied in Pillar 2, by replacing it with a requirement within the framework of Article 458 of the Capital Requirements Regulation. The change is proposed to enter force from 31 December 2018. Under the Swedish FSA's proposal, the risk exposure amount as per SBAB's interpretation of 30 June 2018 would amount to around SEK 113 billion, which corresponds to a CET1 capital ratio of 12.3% and a total capital ratio of 18.0%. In nominal terms, the total capital requirement is not significantly affected by the measure proposed by the Swedish FSA. The minimum requirement rises as does the buffer requirement. At the same time, the Pillar 2 capital requirement decreases by a corresponding amount since the existing Pillar 2 requirement of 25% for residential mortgage is removed. However, the current proposal does entail an increase in the risk exposure amount. The consequence is that the capital ratios and the capital requirement expressed as a percentage of the risk exposure amount decreases, while the difference in absolute terms is negligible. SBAB's capacity to meet the total capital requirement is thus unaffected.

The leverage ratio amounted to SEK 3.56% (3.66) at 30 June 2018.

For more information on SBAB's capital position, please refer to Note 10.

# OTHER INFORMATION

### SBAB's financial targets

- Profitability: A return on equity of no less than 10% over a business cycle.
- Capitalisation: The CET1 capital ratio and total capital ratio should be at least 1.5 percentage points higher than the requirements communicated by the Swedish FSA.
- Dividend: Ordinary dividend of at least 40% of profit for the year after tax, taking the Group's capital structure into account.

### Risks and uncertainties

The Swedish economy is susceptible to global economic developments and to conditions in the international financial markets. The economic trend in Sweden is the primary risk factor for SBAB's future earnings capacity, and the quality of our assets is mainly exposed to credit risks in the Swedish housing market. The management of interest-rate and currency risks entails some exposure to price risks. Household demand posted a stable trend, underpinned by low inflation, low interest rates, and rising stock market and property prices. However, in Q2 2018, consumer confidence declined markedly. Housing prices declined toward the end of 2017, some of which was recovered in Q1. In Q2, house prices have remained relatively still. A housing market with soaring prices over an extended period, together with rising household debt has resulted in the Swedish economy becoming sensitive to rapid changes in interest rates and house prices. The risks associated with these factors are expected to increase as long as debt continues to increase faster than income. The extensive regulatory changes in the residential mortgage market, increased offering of new builds, protraction of the time taken to sell and more uncertain property market conditions all comprise uncertainty factors.

### Dividend

The AGM resolved to distribute a dividend of 40% of net profit for the year, corresponding to SEK 684 million, for 2017. Full details of the proposed appropriation of earnings is available

from SBAB's 2017 Annual Report, on page 76. The dividend was distributed on 2 May 2018.

#### **MREI**

In December 2017, the Swedish National Debt Office (SNDO) decided on plans for how banks and other financial institutions are to be managed in a crisis situation. In conjunction with this, SBAB Bank AB (publ) was assessed as critical to the financial system, which means that in the event of a crisis, SBAB Bank AB (publ) would be managed via resolution. The SNDO has established a Group resolution plan and a minimum requirement for own funds and eligible liabilities (MREL) for SBAB Bank AB (publ) and AB Sveriges Säkerställda Obligationer (publ) (Swedish Covered Bond Corporation — SCBC).

On 18 June 2018, the SNDO announced that the principle for subordinated debt should also apply for SBAB Bank AB (publ), which means that all liabilities used by SBAB Bank AB (publ) to meet MREL are to be subordinated and thus should be possible to be written down before other liabilities and be converted into capital in a financial crisis. SBAB Bank AB (publ) is permitted to gradually build up the volume of subordinated debt required to meet MREL in the period leading up to 2022.

### Effects of IFRS 9 at 1 January 2018

Upon the transition to IFRS 9, the net of reserves and provisions for expected credit losses in the Group decreased SEK 46 million. The overall effect increased equity (before tax) by a corresponding amount at 1 January 2018. For more information, please refer to notes 12 and 15.

### Events after the end of the period

No significant events occurred after the end of the period.

### Auditors' review report

### NOTE 1 Accounting policies

The SBAB Group applies the International Financial Reporting Standards (IFRS) as adopted by the EU. In addition to these accounting standards, the Swedish FSA's regulations and general guidelines on annual accounts for credit institutions and securities companies (FFFS 2008:25), the Swedish Annual Accounts Act for Credit Institutions and Securities Companies and the Swedish Financial Reporting Board's recommendation RFR 1 Supplementary Accounting Rules for Groups have been taken into consideration. The Group's interim report fulfils the requirements stipulated under IAS 34, Interim Financial Reporting.

Statutory IFRS is applied for the Parent Company, which means that this interim report has been prepared in compliance with IFRS subject to the additions and exceptions that ensue from the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities, the Swedish FSA's regulations and general guidelines on annual accounts for credit institutions and securities companies (FFFS 2008:25) and the Swedish Annual Accounts Act for Credit Institutions and Securities Companies.

IFRS 9 Financial Instruments replaces IAS 39 Financial Instruments in its entirety and encompasses classification and measurement, and impairment and hedge accounting. A separate project under the IASB is ongoing with regard to macro hedge accounting. SBAB applies the mandatory sections pertaining to classification and measurement and impairment from 1 January 2018. Under IFRS 9, classification is based on both the entity's business model and the contractual cash flow characteristics. This classification, in turn, determines the measurement. The impairment model under IFRS 9 is based on expected credit losses as opposed to the previous model, which is instead based on incurred credit losses at an earlier stage. For further information regarding the company's accounting policies regarding IFRS 9, please refer to Note 1, page 84-85, of the 2017 Annual Report. The rules have been applied through the adjustment of the balance sheets of the Group and the subsidiaries at the date of initial application of the standard, January 1, 2018, refer to Note 12 and 15. No requirements apply for restatement of comparative periods.

#### IFRS 15 - Revenue from Contracts with Customers

The standard introduces a five-step model to determine when revenues within the scope of IFRS 15 will be recognised. Depending on when certain criteria are met, income is either recognised over time in a manner that shows the company's performance, or at a point in time when control over the goods or services is transferred. The introduction will not have any material effect on SBAB's financial reporting. The standard became effective as of 1 January 2018.

All other accounting policies and calculation methods are unchanged in comparison with the Annual Report 2017. These consolidated condensed financial statements have been prepared on a going concern basis. On 17 July 2018, the Board of Directors approved the consolidated condensed financial statements for publication

#### Introduction of new accounting standards

#### IFRS 16 Leases

The new IFRS 16 standard has changed the lease classification criteria. IFRS 16 has been adopted by the EU and will apply from the 2019 financial year. The new standard entails that all leases (with the exception of short-term and smaller leases) are to be recognized as right-of-use assets with corresponding liabilities in the lessee's balance sheet, and the lease payments recognized as depreciation and interest expense. Moreover, disclosure requirements will apply. SBAB's preliminary assessment is that the introduction of IFRS 16 will have a limited effect on the financial reports.

#### Forthcoming amendments

According to SBAB's preliminary assessment, other new or changed Swedish and international accounting standards that have been published but not yet applied will have a limited effect on the financial reports.

### NOTE 2 Net result of financial transactions

|  | 2018 | 2018 | 2017 | 2018    | 2017    | 2017    |

| Group, SEK million                                     | Q2   | Q1   | Q2   | Jan-Jun | Jan-Jun | Jan-Dec |
| Gains/losses on interest-bearing financial instruments |      |      |      |         |         |         |
| – Securities measured at FVTPL                         | -31  | -47  | -42  | -78     | -60     | -109    |
| - Change in value of hedged items in hedge accounting  | -208 | 2    | 307  | -206    | 636     | 795     |
| - Realised gain/loss from financial liabilities        | -48  | -36  | -36  | -84     | -202    | -318    |
| - Derivatives in hedge accounting                      | 205  | 15   | -311 | 220     | -623    | -764    |
| - Other derivatives                                    | 47   | 33   | 68   | 80      | 220     | 320     |
| - Loan receivables                                     | 11   | 13   | 15   | 24      | 25      | 73      |
| Currency translation effects                           | -4   | -6   | -3   | -10     | -3      | -9      |
| Total  | -28  | -26  | -2   | -54     | -7      | -12     |

SBAB uses derivatives to manage interest rate and currency risks in the Group's assets and liabilities. Derivatives are recognised at fair value in the balance sheet. SBAB's risk management and hedge accounting strategies entail that profit variations between periods may arise for individual items in the table above, as a result of

changes in market interest rates, but that they are in general offset by profit variations in other items. Profit variations not neutralised through risk management and hedge accounting are commented on in the administration report.

| Total   | 8    | 10   | _    | 18      |         | 24      |

<sup>1)</sup> Credit provisions for loan commitments are included in the "Provisions" item in the balance sheet.

The positive change in credit stage 3 is explained by recoveries of previous impairments of defaulted loans. For further information about definitions and assumptions for judgements and calculations of credit risk and the various credit stages under IFRS 9, refer to SBAB's 2017 Annual Report, Note 1, pages 84–85.

### NOTE 4 Lending to the public

### Fair value measurement of financial instruments

The measurement policies for financial instruments recognised at fair value in the balance sheet are provided in Note 1 Accounting Policies in the 2017 Annual Report. In the Total fair value column above, information is also provided on the fair value of financial instruments that are recognised at amortised cost in the balance sheet.

The carrying amounts for current receivables and liabilities have been assessed as equal to their fair values. Investments held to maturity were measured at quoted prices, Level 1.

For Lending to the public, Issued debt securities and Subordinated debt, fair value is established based on generally accepted valuation techniques. As far as possible, calculations made in conjunction with measurement are based on observable market data. The main tools used are models based on discounted cash flows. Issued debt securities and subordinated debt are measured at the Group's current borrowing rate, Level 2.

For Lending to the public, where no observable credit margin data is available at the time of measurement, the credit margin on the most recent date for changes in terms is applied to set the discount rate, Level 3.

The measurement policies for financial instruments recognised at fair value in the balance sheet are provided in Note 1 Accounting Policies in the 2017 Annual Report. In the table, financial assets and liabilities recognised at fair value in the balance sheet are divided on the basis of the measurement levels used below. No transfers were made between levels in 2017 or 2018.

### Quoted market prices (Level 1)

Measurement at quoted prices in an active market for identical assets and liabilities. A market is deemed to be active if the price data is easily accessible and corresponds to actual regularly occurring transactions. The measurement method is used for holdings of quoted interest-bearing securities and for publicly quoted derivatives, primarily interest-rate futures.

### Measurement based on observable market data (Level 2)

Measurement aided by external market information other than quoted prices included in Level 1, such as quoted interest rates or prices for closely related instruments. The main tools used are models based on discounted cash flows.

This group includes all non-quoted derivatives.

### Measurement based in part on unobservable data (Level 3)

Measurement whereby a material component of the model is based on estimates or assumptions that do not originate directly from the market. This method is currently not used on any asset or liability.

### NOTE 9 Liquidity reserve and liquidity risk

The assets in SBAB's liquidity reserve comprises liquid, interest-bearing securities with high ratings and form an integrated part of the Group's liquidity risk management. Securities holdings are limited by asset class and by country, respectively, and must have a AAA rating on acquisition. In addition to these collective limits, limits for individual issuers may also be set. The following table is reported according to the Swedish Bankers' Association's template for liquidity reserve disclosures.

#### Calculation of survival horizon

SBAB measures and stress tests liquidity risk by calculating the survival horizon, which is an internal metric used to identify how long SBAB will be able to meet its payment obligations without access to capital market funding, and includes outflows from deposits under a stressed scenario.

The survival horizon is calculated by totalling the maximum need of liquidity for each coming day and comparing this to the size of the liquidity portfolio after applicable haircuts. The calculations are based on a crisis scenario in which all loans are assumed to be extended on maturity, meaning that no liquidity is added through loan redemption, and where no funding is available and deposits decline. Accordingly, the maximum need for liquidity can be identified for every given future period, and the necessary liquidity reserve can be established. SBAB's survival horizon amounted to 444 days at 30 June 2018 (330 days at 31 December 2017).

#### Liquidity coverage ratio

The liquidity coverage ratio (LCR) is defined in accordance with the European Commission Delegated Regulation with regard to liquidity coverage requirements and calculates the degree to which a bank's liquid assets cover its net cash flows for the coming 30 days in a stressed scenario. Net cash flows comprise contractual inflows and outflows, and theoretical flows based on historical data, for example, withdrawals of the bank's deposits. At 30 June 2018, the LCR was 301% (283) in all currencies consolidated, and 3,522% (4,232) and 685% (305), respectively, in EUR and USD. Measured in SEK, the LCR was 203% (190). For further information on the liquidity coverage ratio, refer to SBAB's report "Disclosure of capital, liquidity and leverage ratio, June 2018."

 $<sup>^{1)}</sup>$  Excess capital has been calculated based on minimum requirements (without buffer requirements)

#### Proposed movement of the risk-weight floor for residential mortgages

The Swedish FSA has proposed introducing the existing risk-weight floor for mortgages applied in Pillar 2 as a requirement within the framework of Article 458 of the Capital Requirements Regulation. The change is proposed to enter force from 31 December 2018. The Swedish FSA maintains that the main reason for the proposed change is structural changes in the Swedish banking market. On 15 March 2018, Nordea Bank AB decided to move its headquarters from Sweden to Finland. The Swedish FSA believes that this change in the market's structure may lead to operators in the Swedish residential mortgage market facing different capital requirements for their Swedish mortgage exposures. Therefore, the Swedish FSA has evaluated how distortion of market competition can be countered and assesses that the current design of the risk-weight floor needs amendment. This is also required to ensure exist-

ing capital requirement levels for mortgage exposures in Sweden. The Swedish FSA believes that both these goals can be achieved by replacing the existing risk-weight floor with a requirement under the framework of Article 458 of the Capital Requirements Regulation. The change means the capital requirement is set as a requirement in Pillar 1. The credit institutions proposed to be encompassed by the measure are those authorised to use the IRB approach and which have exposures to Swedish residential mortgages. The branches of foreign credit institutions in Sweden that are exposed to Swedish residential mortgages and which apply the IRB approach for these may also be affected.

The following calculation is preliminary and is based on SBAB's interpretation of the consultation memorandum FI Ref. 18-6251.

In accordance with the Swedish FSA's proposed movement of the risk-weight floor for residential mortgages

 $<sup>^{1)}</sup>$  The risk-weighted amount for counterparty risk according to the CRR, Article 92(3)(f), amounts to SEK 3,710 million (2,592).

# NOTE 11 Internally assessed capital requirement

The internal capital adequacy assessment aims to ensure that SBAB has adequate capital to deal with any financial problems that arise. The internally assessed capital requirement for the Group amounted to SEK 15,979 million (SEK 15,115 million at 31 December 2017). SBAB quantifies the capital requirement for its risks using a model for economic capital within the scope of the internal capital adequacy assessment process (ICAAP). Economic capital is defined as the amount of capital needed to ensure solvency over a one-year period, given a predetermined level of

confidence. In SBAB's case, the level of confidence is 99.97%, which corresponds to SBAB's long-term AA– target rating (according to Standard & Poor's ratings scale). The internal capital requirement is defined as the higher of economic capital and the regulatory requirements for each type of risk. The table below sets out the internal capital requirement for the consolidated situation, with and without taking into account the Swedish FSA's supervisory practices with regard to the risk-weight floor for Swedish residential mortgages.

<sup>1)</sup> In the internal capital requirement without taking the risk-weight floor into account, additional credit risks in Pillar 2 consist of SBAB's estimated capital requirement in economic capital. Since the additional capital requirement for the risk-weight floor exceeds the additional capital requirement according to economic capital, only the risk-weight floor is included in the internal capital requirement with consideration for the risk-weight floor.

<sup>2)</sup> The higher of the stress test buffer and the capital planning buffer is included in the internally assessed capital requirement. After taking into account the risk-weight floor, the stress test buffer is calculated without consideration for risk migration in the residential mortgage portfolios and, accordingly, the required buffer is smaller.

# NOTE 12 Effect of changes in accounting policies for the Group

Restatement of the balance sheet as of 31 December 2017 on transition to IFRS 9 as of 1 January 2018.

Certain interest-bearing assets in the liquidity portfolio that were reported as held for trading under IAS 39 are assessed under IFRS 9 as part of the business model hold to collect, which will be measured at amortised cost. In order to handle the

inconsistencies that arise in recognition, which arise due to the interest-rate hedging made with derivatives, the fair value option is applied to these assets and are therefore reported at FVTPL.

# PARENT COMPANY

Trend for January-June 2018 compared with January-June 2017

The operating profit totalled SEK 42 million (16). The change was mainly attributable to increased other operating income and positive effects from credit losses. During the period, net interest income decreased to SEK 94 million (125), mainly driven by higher interest expense. The net expense from financial transactions was SEK 46 million (expense: 19). The remeasurement of credit risk in derivatives was the factor with the largest earnings impact during the period. Other operating income totalled SEK 432 million (373) and mainly comprised fees from SCBC for administrative services in line with the applicable outsourcing

agreements. Expenses grew to SEK 516 million (481), mainly due to higher personnel costs. Net credit losses totalled SEK 44 million (recoveries: 1), attributable to an intra-group transfer to SCBC due to transition to IFRS 9 as well as recoveries of previous impairments. Lending to the public declined during the period to SEK 24.3 billion (72.1) as a result of movements of loan assets from SBAB to SCBC. Deposits from the public increased to SEK 117.0 billion (102.7). The CET1 capital ratio was 19.8% (21.5) and the internally assessed capital requirement was SEK 5,481 million (5,797).

### NOTE 13 Lending to credit institutions

Of the Parent Company's lending to credit institutions, SEK 81,301 million relates to a receivable from the wholly owned subsidiary AB Sveriges Säkerställda Obligationer (publ) (Swedish Covered Bond Corporation, SCBC), compared with SEK 92,593 million at the end of 2017. This receivable is subordinated in the event of receivership or liquidation, which means that payment is received only after other creditors of the subsidiary have been paid.

| Reclassified from investments held to maturity        | -                 | -                 | -   | 18,256  | 18,256  |  |  |
| Impairment, expected credit losses                    |                   |                   |   |   |         |  |  |
| Value change recognised directly in equity            | -                 | _                 | -   | 2   | 2       |  |  |
| Opening balance, 1 January 2018                       | 12,931            | 6,240             | 42,142                                    | 135,622   | 196,935 |  |  |

Certain interest-bearing assets in the liquidity portfolio that were reported as held for trading under IAS 39 are assessed under IFRS 9 as part of the business model hold to collect, which will be measured at amortised cost. In order to handle the

inconsistencies that arise in recognition, which arise due to the interest-rate hedging made with derivatives, the fair value option is applied to these assets and are therefore reported at FVTPL.

The Board of Directors and the CEO affirm that this interim report provides an accurate overview of the operations, financial position and performance of the Parent Company and the Group, and describes the significant risks and uncertainties faced by the Parent Company and the companies in the Group.

The information in this report is such that SBAB Bank AB (publ.) is obligated to disclose in accordance with the Swedish Financial Instruments Trading Act and/or the Swedish Securities Market Act, as well as the guidelines contained in the state's ownership policy and the guidelines for companies with state ownership.

The information was submitted for publication on July 18 2018 at 8:00 a.m. (CET).

While every care has been taken in the translation of this report, readers are reminded that the original report, signed by the Board of Directors and the CEO, is in Swedish.

# **AUDITORS' REVIEW REPORT**

### Introduction

We have reviewed the interim report for SBAB Bank AB (publ) for the period 1 January – 30 June 2018. The Board of Directors and the CEO are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies. Our responsibility is to express a conclusion on this interim report based on our review.

### Scope of review

We conducted our review in accordance with the International Standard on Review Engagements (ISRE) 2410 Review of Interim Financial Information performed by the company's auditors. A review consists of making inquiries, primarily with persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with ISA and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report for the Group is not prepared, in all material aspects, in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies and as regards the parent company in accordance the Annual Accounts Act for Credit Institutions and Securities Companies.

Patrick Honeth Authorised Public Accountant

# **APMS**

Alternative performance measures (APMs) are financial metrics of historical or future performance, financial position or cash flows that are not defined in the applicable rules for financial reporting (for example, IFRS and the Swedish Annual Accounts Act) or in the EU's Capital Requirements Directive (CRD IV)/Capital Requirements Regulation (CRR).

SBAB uses APMs when these are relevant for the presentation and follow-up of the Group's financial position and when these metrics are deemed to provide additional valuable information to readers of the financial reports. SBAB has also chosen to present the APMs as they are in common use within the industry. APMs can be calculated with various approaches and, accordingly, SBAB's metrics are not directly comparable with similar metrics presented by other companies.

### **New lending**

**Definition:** Gross lending for the period.

The APM aims to provide the reader with an image of the inflow of new business during the reporting period.

### Deposits/lending

**Definition:** Ratio of total deposits to total lending (closing balances).

The APM aims to provide the reader with further information regarding the relative ratio of deposits to lending.

| Group                                 | 30 Jun 2018 | 30 Jun 2017 |
|---------------------------------------|-------------|-------------|
| Deposits from the public, SEK billion | 117.0       | 102.7       |
| Lending to the public, SEK billion    | 351.5       | 315.6       |
| Deposits/lending, %                   | 33.3        | 32.5        |

### Loan loss ratio

**Definition:** Loan losses for the period in relation to total lending (closing balance). The APM aims to provide the reader with further information regarding the relative ratio of loan losses to total lending.

| Group                              | Jan-Jun 2018 | Jan-Jun 2017 |
|------------------------------------|--------------|--------------|
| Loan losses, SEK million           | 18           | 5            |
| Lending to the public, SEK million | 351,496      | 315,559      |
| Loan loss ratio, %                 | 0.01         | 0.00         |

### Return on equity

**Definition:** Earnings after tax in relation to average (calculated using the opening and closing balances) equity, after adjustment for additional Tier 1 instruments and value changes in financial assets recognised in equity.

The APM aims to provide the reader with further information regarding the Group's profitability in relation to unrestricted equity.

| Group                                   | Jan–Jun 2018 | Jan-Jun 2017 |
|---|--------------|--------------|
| Operating profit after tax, SEK million | 887          | 835          |
| Average equity, SEK million             | 13,8711)     | 13,195       |
| Return on equity, %                     | 12.8         | 12.7         |

<sup>1)</sup> Average equity adjusted for dividend for 2017 of SEK 684 million.

#### Net interest margin

**Definition:** Net interest income in relation to average (calculated using the opening and closing balances for the reporting period) total assets.

The APM aims to provide the reader with further information regarding the Group's profitability.

| Group                             | Jan-Jun 2018 | Jan-Jun 2017 |
|-----------------------------------|--------------|--------------|
| Net interest income, SEK million  | 1,681        | 1,556        |
| Average total assets, SEK million | 440,632      | 39,191       |
| Net interest margin, %            | 0.76         | 0.79         |

### C/I ratio

 $\textbf{Definition:} \ \text{Total operating expenses, excluding loan losses, in relation to total operating income.}$ 

The APM aims to provide the reader with further information regarding the Group's cost-efficiency.

| Group  | Jan-Jun 2018 | Jan-Jun 2017 |
|--|--------------|--------------|
| Total operating expenses, excluding loan losses, SEK million | 506          | 476          |
| Total operating income, SEK million                          | 1,639        | 1,559        |
| C/I ratio, %   | 30.8         | 30.5         |

### Definitions of other key performance indicators

Number of employees (FTEs) Number of employees expressed as full-time equivalents (FTEs), adjusted for sick leave and leave of absence

CET1 capital ratio

CET1 capital in relation to risk-weighted assets

Total capital ratio

Own funds in relation to risk-weighted assets

Tier 1 capital ratio Tier 1 capital in relation to risk-weighted assets

Leverage ratio Tier 1 capital in relation to total assets and off-balance sheet exposures restated with the application of credit conversion factors

Liquidity coverage ratio (LCR) Liquid assets in relation to net cash outflows over a 30-day stress scenario in accordance with the European Commission's Delegated

Regulation EU (2015/61) with regard to liquidity coverage requirements

Survival horizon The number of days that the need for liquidity can be met in a stress scenario before new liquidity is needed

Net stable funding ratio, NSFR A liquidity risk metric of a structural nature that demonstrates the stability of the Group's funding in relation to its assets
