# **SBAB! Interim Report**

1 January - 31 March 2015 | SBAB Bank AB (publ)

### Continued good volume growth and profit trend

### First quarter 2015 (Fourth quarter 2014)

- New lending amounted to SEK 13.3 billion (15.7). Total lending increased to SEK 265.0 billion (261.4).
- The number of residential mortgage customers increased to SEK 160,708 households (160,034).
- Total deposits increased to SEK 63.9 billion (60.6) distributed over 276,047 active deposit accounts (267,712).
- Operating profit increased to SEK 450 million (441) and to SEK 336 million (318) excluding net income/expense from financial instruments and restructuring costs.
- Net interest income increased to SEK 555 million (549).
- Expenses fell to SEK 194 million (223), of which restructuring costs accounted for SEK 1 million (3).
- The net effect of loan losses increased to a negative SEK 3 million (positive: 8).
- Return on equity was 12.5% (12.8), and 9.4% (9.3) excluding net income/expense from financial instruments and restructuring costs.
- The Common Equity Tier 1 capital ratio, without transitional regulations, amounted to 27.5% (29.8).

| Operating income             | New lending                              |
|------------------------------|--|
| <b>450</b> SEK million (441) | 13.3 SEK billion (15.7)                  |
| Total lending                | Number of residential mortgage customers |
| 265.0 SEK billion (261.4)    | 160,708(160,034)                         |

**SBAB**'s business concept is to use innovation and thoughtfulness to offer loans and savings to private individuals, tenant-owner associations and property companies in Sweden. SBAB was founded in 1985 and is owned by the Swedish state. SBAB has about 350,000 customers and 400 employees. SBAB had Sweden's most satisfied residential mortgage customers in 2014, according to Swedish Quality Index (Svenskt Kvalitetsindex). Read more at sbab.se, twitter.com/sbabbank, facebook.com/sbabbank.

### Statement by the CEO

The excellent inflow of new customers and expanding volumes within residential mortgages continued during the first quarter, resulting in growing market shares in the residential segment. On the corporate client side, we are encountering favourable demand and expect volumes to increase further during the year. Our deposit operations also experienced continued favourable inflow of new customers and increasing volumes, both on the retail and corporate client sides.

During the third quarter last year, we adopted a new strategic direction involving focusing on residential mortgages and housing financing. As a result of this strategic decision, the fund offering has now been wound up and the development of additional banking services has been discontinued. All resources are now being directed towards achieving our vision – to offer the best residential mortgages in Sweden.

We have reinforced our position on the residential mortgage market. According to Swedish Quality Index (Svenskt Kvalitetsindex, SKI), we have the most satisfied residential mortgage customers in Sweden, and in our latest survey, we were ranked number two in brand awareness among the general public. To set us apart in the residential mortgage market, reinforce our position further in the long term and achieve our

vision – to offer the best residential mortgages in Sweden – we are working to develop and strengthen our customer offering. These efforts are exemplified by the launch in the fourth quarter of the *Värdeguiden* app (the value guide), the web service *Bytabostadsguiden* (a guide to changing homes) and *Gröna lånet* (the green loan) to tenant-owner associations.

The trend of declining interest-rates has continued during the first quarter, partially through the Riksbank's cut of the repo rate to the all-time low of -0.25%. The low interest-rate level, combined with favourable demand for our bonds from investors, has reduced our cost of funding. We have transferred the lower cost of funding to our customers by cutting interest-rates on residential mortgages. Our 3-month standard interest-rate of 1.79% is currently the lowest rate in the market.

Our profit trend is strong, thanks to our cost-efficiency enhancement programme and the fact that our residential mortgage margins were stable in the quarter. However, our costs will be adversely impacted; both in the short term, due to the increased resources required for handling the strong inflow of new customers, and in the long term, due to regulatory developments. We are currently striving to adapt to regulations that will be introduced later this year, such as transparency requirements for residential mortgage interest-rates and the new amortisation requirement. We still believe that we will meet our cost target for the full financial year 2015.

The EU Mortgage Credit Directive recently presented the residential mortgage inquiry. It will result in and require a relatively extensive development and adaptation of our operations in several areas. The Basel Committee has submitted proposals on new standard regulations and risk weights for credit risks that may affect Swedish residential mortgage providers in a particularly negative way and may, unfortunately, result in higher interest-rates for our customers.

Developments in the financial and property markets are raising concerns. There is a risk that the extremely low interest-rate level could cause share, bond and property price bubbles instead of the desired economic growth and inflation. The price per square metre for tenant-owner rights is skyrocketing in certain parts of Sweden. Responsible lending is our principal focus, and we are currently reviewing our credit approval process to assess whether there is a need to limit lending where the loan to value ratio is at its highest and the trend in housing prices is the strongest.

Trends in the world around us, combined with our high ambitions of developing our operations, will most likely make 2015 a highly eventful year.

Klas Danielsson, CEO

### Market development and volumes

# Development during the first quarter 2015 compared with the fourth quarter 2014

#### Retail

SBAB offers savings and loan products to private individuals. The number of residential mortgage customers amounted to 160,708 households (160,034) at the end of the period. Residential mortgages are offered under our own brand and through partnerships with banks and estate agents.

The housing market is overheated in parts of the country and the price increase is steep or very steep, primarily in the metropolitan areas and other major cities. The number of properties for sale in these markets is low, and it is a seller's market, which drives prices upwards. Bidding processes are tending to drive prices even faster than in the previous quarter. An increasing number of homes do not even make it onto the open market – the buyers make offers that are accepted by the sellers, bypassing the open market. Underlying structural factors, such as demography, residential construction, income growth and employment rates, as well as tax systems and sets of rules and regulations, drive the housing markets. Another additional factor is the amortisation rules that will be introduced on 1 August. The rules have not yet entered into force, but they already seem to be causing increased pressure in the housing market. There may be a dampening of the market after the introduction of the amortisation rules. Interest-rates have continued their decline, with sharper falls at the end of the quarter.

The greater majority of residential mortgage customers choose shorter maturities. The share of total lending with a three-month fixed-interest period now amounts to 63.8% (59.4).

New lending to retail customers amounted to SEK 11.2 billion (13.1) for the quarter. Total lending to retail customers amounted to SEK 186.9 billion (183.4). In residential mortgages to private individuals, SBAB's market share amounted to 7.33% (7.30) and for consumer loans, it was 0.86% (0.83).

The interest-rate on SBAB's deposit accounts has been reduced due to falling market rates, but it is still highly competitive and creates a strong inflow. SBAB's retail deposits rose by SEK 1.4 billion (1.9) during the quarter, to a total of SEK 49.3 billion (47.9). The market share within retail deposits amounted to 3.55% (3.53).

In 2015, SBAB will focus on driving increased digitisation in the form of simplified IT systems and processes, increased digital communication and an improved digital customer experience, with the aim of meeting customer behaviour and demand. Due to increased digitisation, SBAB offers better services. We are becoming more cost-efficient and able to grow at low margin costs, which will turn us into a company that is strong and competitive in the long term.

### Corporate clients and tenant-owner associations

SBAB offers savings and loans to property companies and tenant-owner associations. The number of customers amounted to 3,082 (3,173) at the end of the period. Our business is relationship-oriented. We offer extensive credit and property expertise and actively develop both new and existing customers. This is particularly true with regard to our contacts with property companies.

During the first quarter, SBAB participated in a number of property fairs and arranged customer seminars for tenant-owner associations. For the eighth time, we participated in the world's largest property fair: MIPIM in Cannes.

With a focus on sustainable housing, we launched a green loan. The green loan is offered to existing tenant-owner association and property company customers who intend to invest in measures that either improve the environment or save energy. The interest-rate on green loans will be particularly low for these investments.

The market is characterised by continued good access to liquidity and a high level of activity. The transaction market ended on a high in 2014 and continued to show strong development during the first quarter. The major property companies in Sweden are the predominant buyers. We also note increased interest for investments in communal properties. The market for restructuring from rented to tenantowned apartments has slowed down, mostly due to insufficient interest for such restructurings amongst tenants and also due to the fact that public housing companies in Stockholm have ceased to sell their properties.

New lending to tenant-owner associations and corporate clients amounted to SEK 2.1 million (2.6). Total lending amounted to SEK 78.3 billion (78.2). The tenant-owner association market share was 13.65% (13.82) on the last day of February, and the corporate client market share was 9.51% (9.35).

Deposits from corporate clients rose by SEK 1.9 billion (1.4) to a total of SEK 14.6 billion (12.7). The market share within deposits from corporate clients (not financial companies) increased to 1.78% (1.53).

### Financial performance

# Development during the first quarter 2015 compared with the fourth quarter 2014

#### Operating profit

Operating profit increased to SEK 450 million (441). Excluding net income/expense from financial instruments and restructuring costs, operating profit increased to SEK 336 million (318). The difference in operating profit between the quarters is mostly related to an improved net interest income and lower costs.

#### Net interest and net commission income

Net interest income rose to SEK 555 (549) in the period, driven by an increased volume and improved lending margins. Net commission income for the period amounted to an expense of SEK 23 million (expense: 20), including a fee of SEK 32 million (24) for the government stability fund.

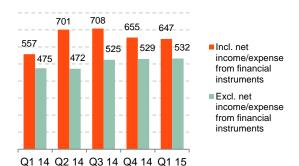

#### Expenses

Expenses dropped to SEK 194 million (223). The reduction in expenses is primarily explained by the wound up fund offering and discontinued development of banking services, as well as by the ongoing cost efficiency programme.

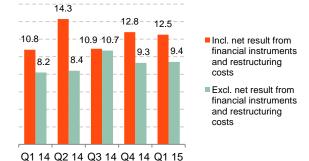

#### Loan losses

The net effect of loan losses was a negative SEK 3 million (positive: 8) during the first quarter. For further information, please see Note 3.

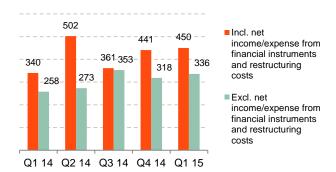

### Operating income, incl. and excl. net income/expense from financial instruments (SEK million)

### Return on equity, incl. and excl. net result from financial instruments and restructuring costs (%)

### Operating profit, incl. and excl. net income/expense from financial instruments and restructuring costs (SEK million)

# Common Equity Tier 1 capital ratio without transitional regulations (%)

### Net income/expense from financial instruments measured at fair value

Net income from financial instruments measured at fair value amounted to SEK 115 million (126) for the period. The greatest factor impacting earnings was unrealised market value changes on basis swaps and the liquidity portfolio. Basis swaps are used to minimise interest-rate and currency risks that arise in conjunction with funding in foreign currency. For further information regarding how changes in market values affected profit for the period, please see Note 2.

#### Lending and deposits

New lending for the period amounted to SEK 13.3 billion (15.7) and the total lending volume increased to SEK 265.0 billion (261.4). Deposits rose by SEK 3.3 billion (3.4) in the quarter to SEK 63.9 billion (60.6).

#### Funding

The total value of covered debt securities in issue declined by SEK 1.5 billion during the quarter to SEK 241.7 billion (243.2). During the quarter, securities amounting to SEK 21.6 billion (34.2) were issued, securities amounting to SEK 5.6 billion (9.0) were repurchased and securities amounting to SEK 16.0 billion (21.9) matured. In the quarter, additional Tier 1 instruments were issued. The transaction was issued in SEK with a volume of SEK 1.5 billion.

Funding through the issuance of covered bonds takes place in the wholly owned subsidiary AB Sveriges Säkerställda Obligationer (publ) (Swedish Covered Bond Corporation), "SCBC". Total outstanding covered debt totalled SEK 173.1 billion (175.0), compared with SEK 152.7 billion at the beginning of the year.

### Capital adequacy

Credit risk is mainly reported in accordance with the IRB approach, and operational and market risks are reported in accordance with the standardised approach. According to the capital target, Common Equity Tier 1 capital ratio according to Pillar 1, without consideration for transitional rules, shall amount to at least 22%. As at 31 March 2015, the Common Equity Tier 1 capital ratio was 27.5% (29.8). The total capital ratio according to Pillar 1, without consideration for transitional rules, amounted to 40.1% (44.7). This provides a comfortable margin to applicable external regulatory requirements. For information concerning other capital ratios, refer to the table on page 17. Profit/loss for the period was not included in own funds this quarter. The expected dividend has reduced own funds and, in combination with an increased credit volume, this affected capital ratio levels.

The internally assessed capital requirement amounted to SEK 6,796 million (6,620) for the Group and SEK 2,976 million (2,884) for the Parent Company.

### Liquidity reserve

The liquidity reserve comprises liquid, interest-bearing securities with a high rating. The market value of the assets in the liquidity reserve amounted to SEK 58.6 billion (58.6). Taking the Riksbank's haircuts into account, the value of the assets was SEK 55.4 billion (55.4).

SBAB measures and stress-tests liquidity risk by calculating the survival horizon, which is an internal ratio used to see for how long contractual payment obligations can be met without access to capital market funding and net outflows from lending/deposits. This is made by totalling the maximum need of liquidity for each coming day and comparing this to the size of the liquidity portfolio after applicable haircuts. The survival horizon amounts to 231 (234) days, which the Company considers satisfactory.

The Liquidity Coverage Ratio is calculated in accordance with the Swedish Financial Supervisory Authority's regulation FFFS 2012:6. In the beginning of the year, the Liquidity Coverage Ratio was 192% for all currencies combined, 1,745% for the EUR and 1,623% for the USD, which exceeds the minimum requirement of 100%. In SEK, the Liquidity Coverage Ratio amounted to 96%. Liquidity Coverage Ratio is a ratio affected by the amount of maturities within 30 days.

For further information on the liquidity reserve, the calculation of survival horizon and the Liquidity Coverage Ratio, see Note 9.

### Performance for January-March 2015 compared with January-March 2014

Operating profit for the period increased to SEK 450 million (340). Income rose to SEK 647 million (557), with the increase primarily due to an improved net interest income and net income/expense from financial instruments. Net interest income rose to SEK 555 (496), driven by a sharp increase in volume and improved lending margins. Net income from financial instruments measured at fair value increased to SEK 115 million (82) and was mainly affected by changed market values of basis swaps and the liquidity portfolio.

Costs for the period amounted to SEK 194 million (219). The reduction in expenses is primarily explained by the wound up fund offering and discontinued development of banking services, as well as by the ongoing cost efficiency programme. Loan losses amounted to an expense of SEK 3 million (gain 1). Confirmed loan losses remained low.

### Other significant information

### Rating

In March 2015, Moody's removed SBAB's "Negative Outlook". At the same time, the A2/P-1 credit rating was confirmed and SBAB's outlook was upgraded to "Stable Outlook". Standard & Poor's long-term and short-term ratings of SBAB remained unchanged over the year, A and A-1, respectively. Current ratings are stated below.

| Rating              | 31/03/2015 | 31/03/2014 | 31/12/2015 |
|---------------------|------------|------------|------------|

### Risks and uncertainties for the Group and the Parent Company

The economic trend in Sweden is the primary risk factor for SBAB's future earnings capacity, and the quality of the assets is mainly exposed to credit risks in the Swedish housing market. The management of interest-rate and currency risks entails some exposure to price risks. Household demand is showing a stable trend, underpinned by low inflation, low interest-rates and rising stock market and property prices. The Swedish economy is sensitive to global economic developments and to conditions in the international financial markets. The risks associated with these factors have subsided in recent years. A strained housing market and high household indebtedness among retail customers result in the economy also being sensitive to changes in interest-rates and house prices. The risks associated with these factors are expected to increase as long as housing prices and indebtedness continue to rise faster than incomes. The many regulatory changes relating to the residential mortgage market constitute further uncertainties. For further information on SBAB's risks and risk management, please refer to the Risk Management section and Note 2 in the 2014 Annual Report.

### New members of the Executive Management

In the first quarter 2015, two new members of the Executive Management assumed their positions: Robert Burén as CIO and Elizabet Sulj Jönsson as Head of Communications.

### New office premises

In February 2015, a new lease was signed with Fabege regarding office premises in Solna, outside Stockholm. The head office will move to the new premises during the fourth quarter of 2015.

#### Events after the balance sheet date

### **Annual General Meeting 2015**

SBAB held its Annual General Meeting on 22 April 2015. Following the Annual General Meeting, SBAB's Board of Directors comprise the following members:

Bo Magnusson (Chairman), Jakob Grinbaum (Deputy Chairman), Carl-Henrik Borg, Lars Börjesson, Kristina Ekengren, Anders Heder (employee representative), Jane Lundgren-Ericsson, Ebba Lindsö, Karin Moberg and Helen Vallin (employee representative).

It was further resolved at the Annual General Meeting that the target for SBAB's capital structure shall be a Common Equity Tier 1 capital ratio of at least 22%

### Financial calendar

<sup>\*</sup>The comparative figures as at 31 March 2014 were recalculated after the interim report was prepared for the first quarter of 2014, but prior to the reporting to the Swedish Financial Supervisory Authority.

<sup>\*\*</sup>The risk-weighted exposure amount for counterparty risk according to CRR, Article 92, item 3(f), amounts to SEK 1,980 million (1,376).

### **Notes**

#### Note 1 Accounting policies

The SBAB Group applies the International Financial Reporting Standards (IFRS) as adopted by the EU. In addition to these accounting standards, the Swedish Financial Supervisory Authority's regulations and general guidelines on annual accounts for credit institutions and securities companies (FFFS 2008:25), the Annual Accounts Act for Credit Institutions and Securities Companies and the Swedish Financial Reporting Board's recommendation RFR 1 Supplementary Accounting Rules for Groups have been taken into consideration. The Group's interim report fulfils the requirements stipulated under IAS 34, Interim Financial Reporting.

For the Parent Company, statutory IFRS is applied, which means that the interim report has been prepared in compliance with IFRS subject to the additions and exceptions that ensue from the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities, the Swedish Financial Supervisory Authority's regulations and general guidelines on the annual accounts of credit institutions and securities companies (FFFS 2008:25) and the Annual Accounts Act for Credit Institutions and Securities Companies.

The accounting policies and calculation methods are unchanged compared with the 2014 Annual Report.

According to SBAB's preliminary assessment, new or changed international accounting standards that have been published but not yet applied will have a limited effect on the financial reports. As regards IFRS 9, which will become mandatory on 1 January 2018, no complete assessment has as yet been made.

| Total  | 115  | 126  | 82   | 115     | 82      | 620     |

#### Fair value recognition

The currency and interest-rate risk inherent in funding conducted in foreign currency is generally hedged throughout the maturity of the funding through currency interest-rate derivatives, known as basis swaps. According to IFRS, all derivative instruments are to be recognised at fair value (market value). Major variations in the actual market value between reporting periods could result in significant changes in the carrying amount and thus also in capital adequacy. However, changes in the form of losses/gains remain unrealised as long as the basis swap is not closed prematurely. In cases where the derivative is held to maturity, earnings are not affected by the accumulated changes since the market value of each derivative contract starts and ends at zero. Most of SBAB's basis swaps are held to maturity.

An accounting effect also arises in SBAB's securities holding, since the accounting policies that SBAB applies entail that part of the securities assets are measured at fair value (market value), while a large portion of SBAB's liabilities are measured at amortised cost. Also in the case of securities assets, the market value will be recovered during the remaining maturity if the asset is held to maturity. Most of SBAB's securities are held to maturity.

### Note 3 Loan losses, net

<sup>1)</sup> The distributed income includes net interest income, net commission and other operating income.

Since the second quarter of 2014, SBAB has, in its internal control and monitoring, transitioned to internal calculation of return on equity, based on standardised tax and calculated equity. The comparison figures have been recalculated.

The distributed income includes personnel costs, other expenses and depreciation of property, plant and equipment and amortisation of intangible fixed assets.

<sup>\*</sup>The total agrees with the external income statement.

### Fair value measurement of financial instruments

The principles for the measurement of financial instruments recognised at fair value in the balance sheet are given in the accounting policies in Note 1 of the Annual Report. In the column "Total fair value" above, information is also provided on the fair value of financial instruments that are recognised at amortised cost in the balance sheet. The carrying amount for current receivables and liabilities has been assessed to be equal to the fair value, level 3. For "Lending to the public", where there are no observable credit margin data at the time of measurement, the credit margin on the most recent stipulated date of expiry is applied, Level 3. Debt securities in issue are measured at the Group's current borrowing rate, Level 2.

#### Note 8 Information about fair value

The principles for the measurement of financial instruments recognised at fair value in the balance sheet are given in the accounting policies in Note 1 of the Annual Report.

In the table, financial assets and liabilities recognised at fair value in the balance sheet are divided on the basis of the measurement methods used.

There have been no transfers between the levels in 2015.

#### Quoted market prices (Level 1)

Measurement at quoted prices in an active market for identical assets and liabilities. A market is deemed to be active if the price data is easily accessible and corresponds to actual regularly occurring transactions. The measurement method is used for holdings of quoted interest-bearing securities and for publicly quoted derivatives, primarily interest-rate futures.

#### Measurement based on observable data (Level 2)

Measurement aided by external market information other than quoted prices included in Level 1, such as quoted interest-rates or prices for closely related instruments. This group includes all non-quoted derivative instruments.

#### Measurement based in part on unobservable data (Level 3)

Measurement whereby a material component of the model is based on estimates or assumptions that do not originate directly from the market. This method is currently not used for any assets or liabilities.

#### Note 9 Liquidity reserve

| Liquidity Reserve   |            | Di     | stribution by | currency |       |
|---|------------|--------|---------------|----------|-------|
| SEK million   | 31/03/2015 | SEK    | EUR           | USD      | Other |

| Balances from other banks                                 | -          | -      | -             | -        | -     |
| Securities issued or guaranteed by central governments,   |            |        |               |          |       |
| central banks or multinational development banks          | 21,023     | 10,827 | 9,308         | 888      | -     |
| Securities issued or guaranteed by municipalities or non- |            |        |               |          |       |
| governmental public sector entities                       | 6,317      | 4,974  | -             | 1,343    | -     |
| Covered bonds issued by others                            | 31,246     | 24,698 | 4,821         | 1,511    | 216   |
| Own covered bonds   | -          | -      | -             | -        | -     |
| Securities issued by non-financial companies              | -          | -      | -             | -        | -     |
| Securities issued by financial companies (excl. covered   | -          | -      | -             | -        | -     |
| Other securities  | -          | -      | -             | -        | -     |
| Total assets  | 58,586     | 40,499 | 14,129        | 3,742    | 216   |
| Bank and loan facilities                                  | -          | -      | -             | -        | -     |
| Total   | 58,586     | 40,499 | 14,129        | 3,742    | 216   |
| Distribution by currency                                  |            | 69.1%  | 24.1%         | 6.4%     | 0.4%  |

The table is reported according to the Swedish Bankers' Association's template for the disclosure of a liquidity reserve. The assets in SBAB's liquidity reserve comprises liquid, interest-bearing securities with a high rating and is an integrated part of the Group's liquidity risk management. Holdings in securities are limited by asset class and by country, respectively, and must have the highest rating upon acquisition. In addition to these collective limits, limits for individual issuers may also be set.

### Calculation of survival horizon

SBAB measures and stress-tests liquidity risk by calculating the survival horizon. This is made by totalling the maximum need of liquidity for each coming day and comparing this to the size of the liquidity portfolio after applicable haircuts. The calculations are based on a crisis scenario in which all loans are assumed to be extended on maturity, meaning that no liquidity is added through loan redemption, and where no funding is available. Accordingly, the maximum need for liquidity can be identified for every given future period, and the necessary liquidity reserve can be established.

### Calculation of Liquidity Coverage Ratio

The Liquidity Coverage Ratio calculates the degree to which a bank's assets cover its net cash flow for the coming 30 days in a stress scenario. Net cash flows comprise contractual in- and outflows and the theoretical flows based on historical data, for example, withdrawals of the bank's deposits. The weightings of the theoretical flows are fixed and are determined by supervisory authorities.

### **Parent company**

# Parent company performance in January-March 2015 compared with January-March 2014

Operating profit for the period amounted to SEK 44 million (82). The operating profit was primarily attributable to lower net interest income of SEK 23 million (60). Net income from financial transactions was SEK 64 million (70). Expenses totalled SEK 190 million (233). The net effect of loan losses was an expense of SEK 6 million (gain: 1). Lending to the public amounted to SEK 47.1 billion (47.9). Without transitional rules, the Common Equity Tier 1 capital ratio amounted to 27.5% (22.6).

### Note 10 Lending to credit institutions

Of the Parent Company's lending to credit institutions, SEK 33,386 million relates to a receivable from the wholly owned subsidiary AB Sveriges Säkerställda Obligationer (publ) (Swedish Covered Bond Corporation, SCBC), compared with SEK 31,181 million at the end of 2014. This receivable is subordinated in the event of bankruptcy or liquidation, which means that payment is received only after other creditors of the subsidiary have been paid.

The information in this report is such that SBAB Bank AB (publ) is required to disclose in accordance with the Swedish Financial Instruments Trading Act and the Swedish Securities Market Act, as well as in the guidelines contained in the Swedish Government's ownership policy and the guidelines for companies in which the Government is an owner. The information was submitted for publication on 23 April 2015 at 8.00 a.m. (CET).

While every care has been taken in the translation of this report, readers are reminded that the original report, signed by the CEO, is in Swedish.
